

***stadt.raum* – mapping the city! Be a part of it!**

Summerfestival of EAH and FSU Students' Councils 30.6.–4.7.2015

Call for Actions!

Mapping urban space means reading its signs and making them visible, understanding and interpreting its places and taking up topics connected with them. Furthermore it means to set own signs, to lay imprints, to enter spaces in order to fill them with life.

Sketching urban space is part of our cultural life as much as playing on it, challenging it and modifying it.

The *stadt.raum* - festival 2015 deals with this theme.

Between Uni-Campus, Fachhochschule and KuBuS in Lobeda-West there is space for actions: DIY, music, poetry, theatre, workshops, happenings, discussions, art, criticism and a lot more.

Which places and issues are important to you?

Send us your ideas until 15th of april to stadt.raum@posteo.de !

They should be linked to the spots, where they take place and you should be willing to take responsibility for it.

The description of your project should include a concept, a rough timeline, required financial and logistic resources and the favoured place.

We will choose projects in the categories *think! work! act! dance!* and try to support them logistically, financially and conceptually.
